

CommandQueue.OnUpdate

CommandQueue.UndoLastCommand

CommandQueue.Dequeue

```
graph LR; A[CommandQueue.OnUpdate] --> C[CommandQueue.Dequeue]; B[CommandQueue.UndoLastCommand] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left, labeled 'CommandQueue.OnUpdate' and 'CommandQueue.UndoLastCommand', have blue arrows pointing to a single gray rectangular box on the right labeled 'CommandQueue.Dequeue'. This suggests that both 'OnUpdate' and 'UndoLastCommand' methods utilize the 'Dequeue' method.
