

NPCAISystemTypeA.Awake

NPCAISystemTypeA.Update

NPCAISystemTypeA.HandleEnter  
PatrolState

```
graph LR; A[NPCAISystemTypeA.Awake] --> C[NPCAISystemTypeA.HandleEnter PatrolState]; B[NPCAISystemTypeA.Update] --> C;
```

The diagram illustrates a flow where two separate functions, NPCAISystemTypeA.Awake and NPCAISystemTypeA.Update, both lead to a common function, NPCAISystemTypeA.HandleEnter PatrolState. The source boxes are white with black borders, while the destination box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
