

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class RebindSaveLoad {
        + plnput
    }
    RebindSaveLoad --|> MonoBehaviour
```

The diagram shows a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'RebindSaveLoad' class, represented by a grey box with a black border and two internal compartments. The top compartment of 'RebindSaveLoad' contains the text 'RebindSaveLoad', and the middle compartment contains '+ plnput'. A blue arrow with a hollow triangular head points from the top of the 'RebindSaveLoad' box to the bottom of the 'MonoBehaviour' box, indicating inheritance.

RebindSaveLoad

+ plnput
